

Instruction of printer

The Button 1 is control cut paper, the different positions control full cutting or half cutting, the scale mainboard also can control cut paper(in general, no need to change).

The button 2 is control feed paper automatically (on or off)

If the printer can not feed paper automatically, you can change the buttons to insert the paper.

The steps are as follows:

1. Turn off the machine(scale), push the button 2 (NO position, turn off the function of feed paper automatically), as shown in the figure:

2. Turn on the machine, insert the printing paper to the paper inlet, and then press the Button of “feeding paper” to feed the paper, as shown in the figure:

Full cut:

Format: ASCII CODE ESC i
HEX code 1B 69

Half cut:

Format: ASCII CODE ESC m
HEX code 1B 6D
Decimal code 29 109
