

SES Kindergarten

PRODUCT INTRODUCTION ↓

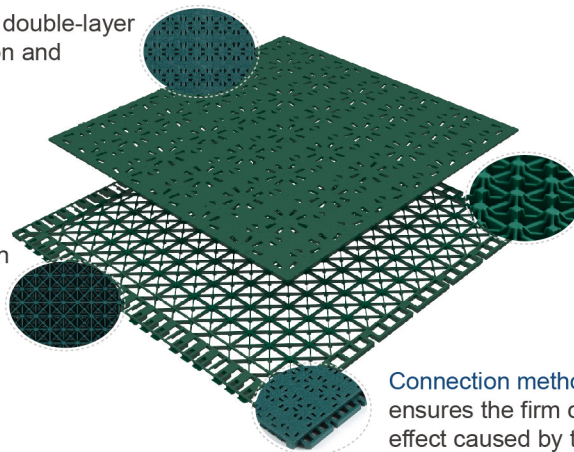

SES kindergarten is special design for preschool education stage. It adopts innovative patented elastic safe materials which can provide outstanding safeguarding ability for children.

PRODUCT STRUCTURE ↓

Surface layer structure: Frosted double-layer asterisk design, enhances friction and anti-slip performance.

Reinforcing layer: The specific design of bottom stiffeners prevent edge warping and provide outstanding shock absorption.

Support layer structure: Stout dense column reinforces the bottom support, master load capacity, makes tile non-deformation.

Connection method: Integrated buckle tightly joint, ensures the firm connection and effectively relieves effect caused by thermal expansion and contraction.

PRODUCT FEATURES ↓

-  Environmental -- Food grade raw material, odorless, non-toxic.
-  Safety -- Elastic soft material can protect the kids from injury.
-  Comfortable -- Offering much better foot feelings to the kids.
-  Colorful -- various color with different color matching.

Model No.	E-SES1001-K	<input checked="" type="checkbox"/>
Material	TPE	<input checked="" type="checkbox"/>
Dimension	30cmx30cmx1.2cm	<input checked="" type="checkbox"/>
Shock Absorption	≥25%	<input checked="" type="checkbox"/>
Ball Rebound	≥95%	<input checked="" type="checkbox"/>
Service Life	10 years+	<input checked="" type="checkbox"/>
Application	High-end primary school playground, kindergarten and other sites.	<input checked="" type="checkbox"/>
