高强度金刚石微粉

High intensity diamond micron powder

产品特点：采用高强度原料，晶型规则，粒度集中，热稳定性好，耐磨性高

产品用途：适用于光学玻璃、精密陶瓷、钻石宝石、特种材料和耐磨材料的抛光

Characteristic: made of high intensity material, the crystal has a regular shape, concentrated grit, good thermal stability, and high wear resistance.

Usage: used for polishing optical glass, fine ceramic, natural diamond, gemstone, special material and abrasive material.

高强度金刚石整形料

High intensity diamond mesh powder

产品特点：采用高强度原料，经过整形，晶型等积且规则

产品用途：适用于电镀、树脂、金属、陶瓷等磨具的制造

Characteristic: made of high intensity material, the crystal is very inerratic and regular after reshaping.

Usage: suitable for electroplating, resin bond, vitrified bond, and grinding tools manufacturing.
