Xin Point Holdings Limited is a leading technology company in the plastic surface treatment industry, supplying decorative parts, especially plastic surface treatment decorative parts, to major global car manufacturers.

Interior Parts

Exterior Parts

Environmentally Friendly & Safe & Reliable

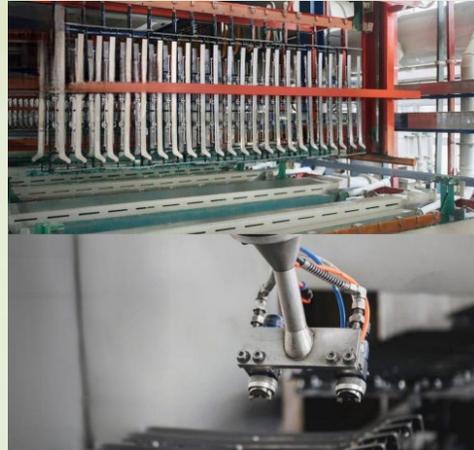

Whether it's design, material selection, or manufacturing process, we always put consumer health and safety first.

We always analyze potential risks from the perspective of customers and users, use the best materials, and produce environmentally friendly, safe and reliable products with Xin Point's industry-leading processes to meet the requirements for use in a variety of vehicle environments.

Environmentally Friendly Material

Environmentally Friendly Processes

Provide environmentally friendly, safe and reliable decorative parts for your car.

General Usage

Xin Point's automotive decorative parts, in the process of use will not consume energy and resources, and will not produce Co2 and other toxic and harmful substances or gas emissions, please rest assured to use.

However, to prevent damage to the protective coating on the surface of these parts, do not use sharp or hard objects to touch these parts.

Maintenance

In the process of using your car, it is inevitable that there will be stains adhering to the surface of these decorative parts, it is recommended to use a clean wet towel to wipe in time. 

If there are stubborn stains that need to be treated, you can use hand sanitizer or laundry detergent.

Although dozens of detergents tested on the parts by our test centers are verified as no effect on the surface of the part. Given the differences in the composition of detergents around the world, please use a clean, wet towel to clean up the detergent residue after use. 

Repair&Recall

Since Xin Point's products are widely used in various brands and models, if you want to know the manufacturer of the plastic surface treatment parts on your car, you need to contact the seller or service provider of your car.

Xin Point Holdings Limited's parts are not directly sold and distributed in the end market please do not believe any similar products on the market directly sold under the name of [Xin Point].

Moreover, personal safety is always the priority for automotive products, so we do not suggest arbitrary disassembly on our products. No matter for what reason, once you want to replace or repair these parts, please be sure to contact the seller or service provider of your car, in order to ensure your health and safety, do not dismantle by your own.

When our products are subject to a recall, we will likewise reach out to you through the seller or service provider.

Scrap & Recycle

All our parts have a recycling value, please contact the seller or service provider of your car for the scrapping and recycling of these products.
