In order to improve the efficiency of multifunctional UV printers, we developed this 1.8m printing-width printer. This printer is simple to operate and very stable. At the same time, we developed 12 different printing solutions for the machine to suit different application scenarios. In the golden varnish scheme, you can use the golden film and laminating machine to bring a gold effect to your pattern. And 1.8m longer printing width can further improve UV production, suitable for most flat materials and personalized printing film.
