Why Produce DTF PRO-604

HANRUN PAPER PRO A-604 DTF PRINTER has upgraded a new color scheme: **CMYK+W+LC/LM/LK/LLK** Nine-color scheme, a new color management system, which solves the problem of noise in printing light-colored patterns in the past. And the gradient area has better performance than before; the nozzle protection device can effectively protect the nozzle during the printing process and reduce the probability of physical damage. The width has also been upgraded, it's a machine which can print with the width of 600mm. At the same time, the new tension system can automatically roll the film to ensure the smoothness and stability of the film, and also reduce the probability of damage to the nozzle.

1

2

PRINT-HEAD PROTECTION DEVICE

During the printing process, it can effectively protect the print head and reduce the physical damage.

3

COLOR MANAGEMENT SYSTEM

Four-nozzle nine-color scheme, gradient printing effect transitions naturally, and the printed colors are much more beautiful

4

CAN PRINT 600MM

600 large wide-format machines print faster and have better results

DTF PRO-A604 PRINTER

Nozzle Type	i3200 4pcs		
Print width	$\leq 600\text{mm}$		
Applicable media	DTF film		
Rip software	Maintop/PP		
Temperature/Humidity	20-30°C	45~65%	
Power	350w		
Print speed	4pass 15 m^2/h	6pass 12 m^2/h	
Machine size	L1820*W820*H1620mm	Net weight	152kg
Package size	L2025*W840*H740mm	Gross Weight	180kg
