Page 2 of 12

When this European Standard (EN 14527: 2016+A1: 2018) is cited in the Official Journal of the European Union (OJEU), it shall be possible to use it as a basis for the establishment of the Declaration of Performance (DoP) and the CE marking, from the date of the beginning of the coexistence period as specified in the OJEU.

The CE marking symbol shall be in accordance with the general principles set out in Article 30 of Regulation (EC) No. 765/2008. It may be followed by a pictogram or any other mark notably indicating a special risk or use.

- It shall be affixed visibly, legibly and indelibly:

 $-\operatorname{to}$ the product or

- to a label attached to it.

- Where this is not possible or not warranted on account of the nature of the product, it shall be affixed:

- to the packaging or

- to the accompanying documents.

Remark:

1. "XXXXX" should be the reference number of the DoP.

2. "YYYYY" should be the unique identification code of the product type.

Summary of testing:

The submitted samples were tested and found to **COMPLY WITH** applicable requirements of EN 14527: 2016+A1: 2018 (E).

Test item particulars:	
Classification of installation and use	For personal hygiene
Supply Connection	_
Possible test case verdicts:	
- Test case does not apply to the test object:	N/A
- Test object does meet the requirement:	P (Pass)
- Test object does not meet the requirement:	F (Fail)
Testing:	
Date of receipt of test item:	July 24, 2018
Date (s) of performance of tests:	July 24, 2018 to August 6, 2018
General remarks:	
responsibility and liability are limited to the terms and conditions of th the Client in accordance with the agreement, for any loss, expense o authorized to permit copying or distribution of this report and then onl	r damage occasioned by the use of this report. Only the Client is y in its entirety. Any use of the Intertek name or one of its marks for ust first be approved in writing by Intertek. The observations and test

"(See remark #)" refers to a remark appended to the report. "(See Appendix #)" refers to an appendix appended to the report.

has ever been under an Intertek certification program.

Throughout this report a comma (point) is used as the decimal separator.

When determining the test result, measurement uncertainty has been considered.

General product information:

1. The covered models were the same as the evaluated models in structure, materials and manufacturer process, just different in size.

	EN 14527		
Clause	Requirement - Test	Result - Remark	Verdict
5	Requirements for class 1 products		
5.1	General		Р
	With each shower tray detailed instructions on installation and care shall be provided.		
5.2	Cleanability		•
5.2.1	Appearance of surface		
	When a shower tray is inspected under strong and oblique illumination, the surfaces intended to come into contact with water shall be visibly smooth, non- absorbent and free from inaccessible corners that would impair cleanability.	Complied	Ρ
	NOTE Surfaces with cracks, chips, crazing and other similar defects are not considered to be smooth.		
	Drainage of water		
5.2.2	Shower trays shall have at least one waste outlet hole. The dimensions of the waste outlet hole shall comply with the requirements of EN 251. Other dimensions are permissible, if the manufacturer provides or recommends a suitable waste fitting.	The submitted samples met the requirement of EN251. No water remained.	Ρ
	All water shall empty from the shower tray unless prevented by surface tension.		
5.3	Durability	•	
5.3.1	General		
	Conformance with requirements of 5.3.2 to 5.3.4 give an assurance of durability of cleanability.		Р
5.3.2	Stability of bottom		
	When tested in accordance with 8.1, there shall be no permanent distortion or other defects, e.g. cracks, such that the requirements of 5.2.2 are not satisfied.	No permanent distortion or other defects.	Р
5.3.3	Resistance to chemicals and staining agents	·	•
	General		
5.3.3.1	When shower trays, other than those made from the materials specified in 5.3.3.2, are tested in accordance with 8.2, the surface finish shall be unaffected by the chemicals and staining agents specified in Table 1 except for superficial surface changes which are removable with water or with water and the specified abrasive agent.	No affection to the surface by the chemicals and stains.	Ρ
	Experience has shown that shower trays made of glazed ceramics comply with these requirements.		

	EN 14527			
Clause	Requirement - Test	Result - Remark	Verdict	
5.3.3.2	Particular requirements for baths made of enamelled steel and enamelled cast iron Shower trays made from enamelled steel and enamelled cast iron shall comply with the requirements given in Table 2.		N/A	
5.3.4	requirements given in Table 2.Resistance to temperature changesWhen tested in accordance with 8.3, all shower trays shall show no evidence of distortion or other defects, e.g. crazing, which will impair their cleanability.Experience has shown that shower trays manufactured from the stainless steel grades listed in Annex A, enamelled steel, enamelled cast iron and		Р	
6	glazed ceramics comply with this requirement. Requirements for class 2 products			
	General			
6.1	With each shower tray detailed instructions on installation and care shall be provided.		Р	
6.2	Cleanability			
6.2.1	 Appearance of surface When a shower tray is inspected under strong and oblique illumination, the surfaces intended to come into contact with water shall be visibly smooth, non-absorbent and free from inaccessible corners that would impair the cleanability. NOTE Surfaces with cracks, chips, crazing and other similar defects are not considered to be smooth. 	Complied	Ρ	
6.2.2	Drainage of water Shower trays shall have at least one waste outlet hole. The dimensions of the waste outlet hole shall comply with the requirements of EN 251. Other dimensions are permissible, if the manufacturer provides or recommends a suitable waste fitting. All water shall empty from the shower tray unless prevented by surface tension.	The submitted samples met the requirement of EN251. No water remained	Ρ	
6.3	Durability			
6.3.1	General Shower trays shall be readily cleanable for their anticipated working life when normal cleaning and maintenance is carried out.	Complied	Р	

Approved by: Bink Xu Effective date: 2019-4-4 Page 6 of 12

	EN 14527			
Clause	Requirement - Test	Result - Remark	Verdict	
	Materials Experience has shown that shower trays made from			
6.3.2	plastics materials, enamelled steel, enamelled cast iron, stainless steel, glazed ceramics or glass and their surfaces intended to come into contact with water have the properties described in 6.3.1.	Complied	Ρ	
	Dangerous substances			
7	National regulations on dangerous substances may require verification and declaration on release, and sometimes content, when construction products covered by this standard are placed on those markets.	Informative	_	
	In the absence of European harmonized test methods, verification and declaration on release/content should be done taking into account national provisions in the place of use.			
9	Marking, labelling and packaging			
10	Assessment and verification of constancy of performance-AVCP			
	General			
	The compliance of a shower tray with the requirements of this standard and with the performances declared by the manufacturer in the Declaration of Performance (DoP) shall be demonstrated by:			
10.1	—type testing (see 10.2);		Р	
	— factory production control by the manufacturer (FPC), including product assessment (see 10.3).			
	The manufacturer shall always retain the overall control and shall have the necessary means to take responsibility for the conformity of the product with its declared performance(s).			
10.2	Type testing			
	General			
10.2.1	All performances related to characteristics included in this standard shall be determined when the manufacturer intends to declare the respective performances unless the standard gives provisions for declaring them without performing tests. (e.g. use of previously existing data, CWFT and conventionally accepted performance).		Ρ	

	EN 14527				
Clause	Requirement - Test	Result - Remark	Verdict		
	Samples, testing and compliance criteria				
10.2.2	The shower tray shall be subjected to and pass the relevant tests in Table 4.		Р		
	The number of samples of shower tray to be tested/assessed shall be in accordance with Table 4 and/or Table 5.				
10.3	Factory Production Control	Factory Production Control			
	General				
	The manufacturer shall establish, document and maintain a factory production control (FPC) system to ensure that the products placed on the market conform with the stated performance characteristics.				
10.3.1	The FPC system shall consist of procedures, regular inspections and tests and/or assessments and the use of the results to control raw and other incoming materials or components, equipment, the production process and the product.	lar The applicant supplied ISO 9001 certificate.			
	The results of inspections, tests or assessments requiring action shall be recorded. The action to be taken when control values or criteria are not met shall be recorded.				
10.3.2	Equipment				
	Testing				
10.3.2.1	All weighing, measuring and testing equipment shall be calibrated and regularly inspected according to documented procedures, frequencies and criteria.	The applicant supplied ISO 9001 certificate.	Р		
	Manufacturing				
10.3.2.2	All equipment used in the manufacturing process shall be regularly inspected and maintained to ensure use, wear or failure does not cause inconsistency in the manufacturing process. Inspections and maintenance shall be carried out and recorded in accordance with the manufacturer's written procedures and the records retained for the period defined in the manufacturer's FPC procedures.	The applicant supplied ISO 9001 certificate.	Р		
	Raw materials and components				
10.3.3	The specifications of all incoming raw materials and components shall be documented, as shall the inspection scheme for ensuring their conformity. In cases where supplied kit components are used, the constancy of performance system of the component shall be that given in the appropriate harmonized technical specification for that component.	The applicant supplied ISO 9001 certificate.	Р

Clause	Requirement - Test	Result - Remark	Verdict
10.3.4	Product testing and assessment The manufacturer shall establish and document procedures to ensure that the stated values of all of	The applicant supplied ISO 9001 certificate.	Р
	the characteristics are maintained.		
	Non-conforming products		
	The manufacturer shall have written procedures which specify how non-conforming products shall be dealt with. Any such events shall be recorded as they occur and these records shall be kept for the period defined in the manufacturer's written procedures.		
	Where the product fails to satisfy the acceptance criteria, the provisions for non-conforming products shall apply, the necessary corrective action(s) shall immediately be taken and the products or batches not conforming shall be isolated and properly identified.		
10.3.5	Once the fault has been corrected, the test or verification in question shall be repeated.	The applicant supplied ISO 9001 certificate.	Р
	The results of controls and tests shall be properly recorded. The product description, date of manufacture, test method adopted, test results and acceptance criteria shall be entered in the records under the signature of the person responsible for the control/test.		
	With regard to any control result not meeting the requirements of this European standard, the corrective measures taken to rectify the situation (e.g. a further test carried out, modification of manufacturing process, throwing away or putting right of product) shall be indicated in the records.		
	Corrective action		
10.3.6	The manufacturer shall have documented procedures that instigate action to eliminate the cause of nonconformities in order to prevent recurrence.	The applicant supplied ISO 9001 certificate.	Р
