

Brom WSP10

Bromhexine Hydrochloride Soluble Powder 1%

Active Ingredient:

Each g contains Bromhexine 10 mg

Pharmacodynamics:

This product is an expectorant. It mainly acts on mucus-producing cells of trachea and bronchial mucosa, inhibits the synthesis of acid mucopolysaccharide protein in sputum, and can break mucin fibers in sputum, so that the rheological properties of trachea and bronchial secretion return to normal, and the mucus is reduced. The sputum is diluted and easy to cough up. In addition, it can also promote the movement of cilia on the surface of the respiratory mucosa, and promote the excretion of sputum, thereby improving the function and defense of the lungs.

Indication:

Adjunctive treatment for chicken respiratory diseases characterized by mucus blocking the airway.

Dosage and Administration:

Poultry: per 100g of product to 300L of tap water (333mg/L) for 3-10 consecutive days or under veterinary guidance.

Precautions:

Laying hens should not be administered 4 weeks before laying and during the laying period.

Storage:

Store in an airtight container, and in a dry place.

Shelf life:

Three years
