What Our Customers Are Saying From Across The Globe

Director of UPS & Data center Division
... pushing new product--micro data center and air conditioner.

TODAY

7:45 AM
Great!
I have a question. Huawei launch modular UPS before, it is made by your company?

Jocelyn Zhu • 9:32 AM
Good morning.
Huawei modular UPS? Which one? why do you guess it made by us? (Edited)

10:27 AM
I thought, your modular UPS quality is very high. Then Huawei is not expert on UPS market, So, I thought, They should ask to other UPS manufacturer.

High customer return rate

Excellent my friend

Its fine installed it on the 4.0 kva and 2.0 Kva and it works fine. will be ordering more next week, thanks much

Trustworthy product

we even sent back the scanner back to them to fix the problem, like screen jittering... then audio is soft, plus a few bugs

but it came back also the same, with minor improvement.

yup, we still got 10k USD worth of the scanner in our office, cannot sell, and cannot return.

Because we have to complete 1070 units remember

23 Jan

with Second container

the same date

Satisfied customers

we liked your products

we did tests and they passed

congratulations

! Angel these equipments can also be OEM and you can send me prices for these equipments.

I wait for comments.

During covid time, we bought a lot of temperature scanner from one supplier in China, in the video and proposal, it looks great, but when it arrive... it's totally a different thing, we order a few batches, and each batches quality was getting worst

but no worries, my friend in Singapore and China told me INVT is very reliable

Excellent product quality

We worked with INVT in past long time ago as well, and we are satisfied with your product quality as well, but we don't know about your services and support so far, as did not have UPS problem so far. You can share INVT special price list for UPS without batteries (Online, Single phase and Three Phase Series).

Regards

Director Business Development

Hello Angel,
I will be sending you later today the PO for the lithium battery solution.
By the way, we are testing your products in Mexico and we like them very much.
Best regards

Great

01 Fengyang Astronergy

Offered product:

2 sets of 500kVA Tower Online UPS

Location: Liaoning·China

In a situation where production is highly automated and operations are highly informative, even a very short power outage can cause the entire production process to stagnate, product scrapping, and even equipment damage.

In order to ensure continuous power for the operation of key equipment and systems such as Fengyang Astronergy industrial production automation equipment and computer information systems, INVT Power proposed a solution of two 500kVA tower online UPS. This series of products uses advanced technology that increases performance and reliability.

02 Antu County Government Affairs Hall

Offered product:

2 sets of 200kVA Tower Online UPS

4 sets of 200Ah batteries

Location: Jilin·China

As a functional institution for social services and management such as economy, security, and politics, the government has become increasingly strict and urgent with the development of office automation and government informatization and the strengthening of its awareness of serving society.

In order to ensure the smooth flow of information and data sharing in the Antu County Government Affairs Hall, INVT Power provided two 200kVA tower online UPS and 4 sets of 200Ah batteries, making the stable and reliable UPS power system a powerful guarantee for data security and integrity.

03 Wuhan Union Hospital of China

Offered product:

400kVA Tower Online UPS

Location: Hubei·China

In modern medical care, the UPS power supply has become a necessary equipment. UPS power supply provides reliable power guarantees for medical facilities and ensures the stable operation of medical equipment.

Based on the specific conditions of Wuhan Union Hospital, INVT Power provided a 400kVA tower online UPS to avoid interruption of medical staff's surgical procedures and provide the emergency power supply to protect the hospital's important data. In addition, it can extend the service life of related equipment and protect equipment from voltage fluctuations.

04 State Grid Xinyi Power Supply Company

Offered product:

2 sets of 60kVA Tower Online UPS

Location: Jiangsu·China

In order to ensure the quality of the power grid of State Grid Xinyi Power Supply Company, the INVT Power technical team recommended the 60kVA tower online UPS solution based on the customer's requirements for "high energy efficiency and convenient maintenance."

This series of UPS can filter clutter interference and voltage fluctuations in the power, ensure the stability of the power quality of the power grid, improve the power supply quality of the power grid, and protect the safety of the power grid and substation equipment.

05 State Grid Shuyang Power Supply Company

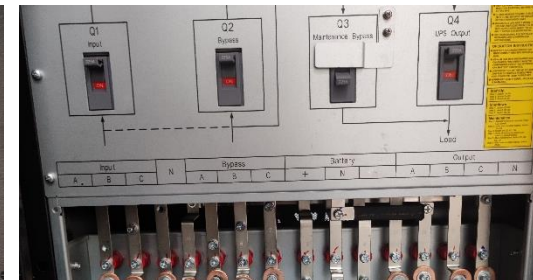

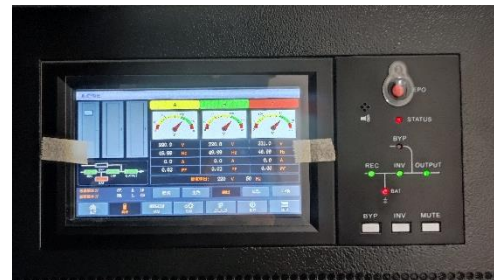

Offered product:

2 sets of 120kVA Tower Online UPS

Location: Jiangsu·China

Recently, INVT Power provided two 120kVA online tower UPS to State Grid Shuyang Power Supply Company to ensure the safe and stable operation of the substation.

This series of UPS can improve the reliability of the power grid. When the power grid fails, the UPS can start immediately to provide reliable backup power for the substation and avoid heavy losses caused by power interruptions. When the main power supply fails or has a power outage, the UPS can immediately take over the power supply and maintain the continuous power supply of the power grid.

06 Jingyuan Gymnasium

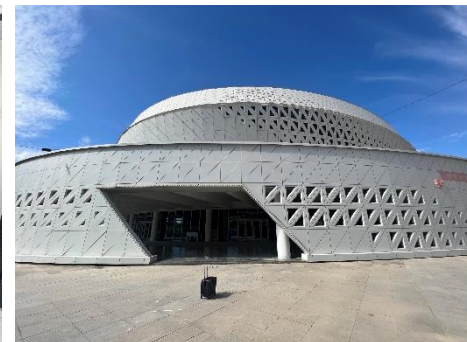

Offered product:

5 sets of 120kVA Tower Online UPS

Location: Gansu·China

Sports venues are highly populated places. When emergencies such as fires, natural disasters, temporary power outages, and other emergencies occur, the realization of functions such as efficiently guiding crowds to evacuate and quickly starting fire extinguishing equipment rely on reliable emergency power supply systems.

Therefore, INVT Power provided 5 sets of 120kVA tower online UPS for Jingyuan Gymnasium, providing the sports industry with a last-second power guarantee solution to ensure the stadium's regular operation.

07

Jilin Provincial Medical Insurance Service Hall

Offered product:

120kVA Tower Online UPS

2 sets of 100Ah batteries

Location: Jilin·China

Recently, Jilin Provincial Medical Insurance Service Hall purchased a 120kVA tower online UPS and 2 sets of 100Ah batteries from INVT Power. For government computer rooms, network reliability and stability are crucial.

This series of UPS has high input factor and low current distortion with front access of serviceability and user-friendly interface, which is efficient and convenient, ensuring zero power switching of equipment and systems, ensuring the security of the government's huge data storage, and maintaining the normal and safe operation of data and public services.

08 Southern University of Science and Technology

Offered product:

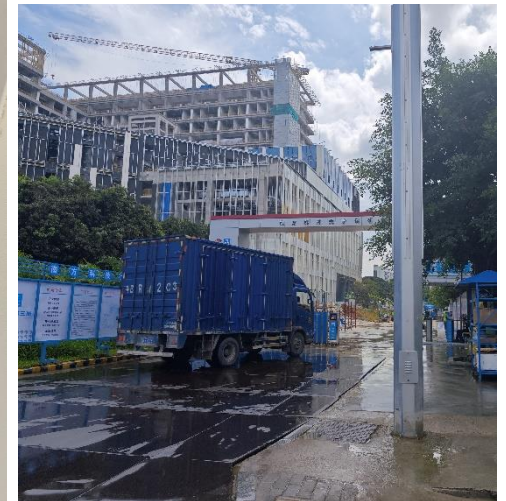

120kVA Tower Online UPS

2 sets of 200Ah batteries

Location: Guangdong·China

In the construction of educational information infrastructure, the power supply system is the source of power for information equipment in the computer room. The main IT load equipment must run 24 hours a day to provide a reliable guarantee for the normal operation of the server host and data storage.

In order to promote the construction of a smart campus and important data security at the Southern University of Science and Technology, INVT Power proposed a solution of 120kVA online tower UPS and 2 sets of 200Ah batteries to ensure the stable operation of the information system.

09 Chemsemi

Offered product:

60kVA Tower Online UPS

Location: Liaoning·China

In the field of industrial manufacturing, the power supply situation in manufacturing plants is complex, and the power requirements from IT equipment to manufacturing equipment are also different. Moreover, for manufacturing plants such as Chemsemi, production continuity is very important. Once a sudden power outage occurs, it will cause huge losses to the company.

Based on this situation, INVT Power provides a 60kVA tower online UPS solution with a modular design of sub-systems to provide reliable power protection for key electrical equipment.

10 Inner Mongolia Xinyuan Silicon Material Technology Co., Ltd.

Offered product:

2 sets of 150kVA Tower Online UPS

Location: Inner Mongolia-China

The large number of applications of various advanced equipment in the industrial field has put forward higher requirements for power supply quality and power supply continuity. The INVT Power team recommended the 150kVA tower online UPS solution after an on-site visit to Inner Mongolia Xinyuan Silicon Material Technology Co., Ltd. and based on the customer's specific needs for UPS.

This series of UPS has multi-protection, over-temperature protection with 8 sensors, over-load, battery under voltage, and so on, which effectively ensures the reliability and continuity of power supply.
