

Supreme Type Valve

The Supreme Type Valve is a stem guided four web seat valve. The cross-arm seat greatly improves impact absorption due to flapping from the valve body, and maximizes service life. It is made with forged alloy steel with polyurethane, Blue lightning, White lightning, or rubber inserts.

Three-web Valve

The Three-web Valve is a stem guided three-web seat valve. It is made with forged alloy steel with polyurethane or carboxylated nitrile inserts. High wear resistance greatly improves service life.

Premium Valve

Double Angle O-Ring Type Valve

Full Open Valve

The Full Open Type Valve is a four-wing guided full open seat valve. This design provides excellent flow characteristics and maximum flow area. eliminates snap rings, or plates in order to ease maintenance and installation, and also handles lost circulation material better than most conventional style valves and seats. It is made with forged alloy steel with polyurethane, white-lightening, or rubber inserts.

Roughneck Type Valve

Roughneck HP Type Valve

FKN (G2) Type Valve

SW Type Valve

Novatech Type Valve

The Novatech Type Valve is a four-wing guided full open seat valve. Its unique design has met with great success and is widely acclaimed by drilling contractors for their tremendous and reliable performance. On one-piece valve bodies, the insert retention groove acts as a circular channel beam to add superior rigidity to the valve body.

GD Type Valve

Plunger Pump Valve

supply for cementing, fracturing , water well and work over drilling purpose. And products are acid-resistant and endure high pressure, temperature, sand ratio, output etc.

Bomco Revolving Type

LS-NOW Type Valve

Hongyang Valve Features

great variety of goods , scientific manufacturing process, good quality of the product. Makes heat treatment in own factory with advanced techniques and computer operated equipments. Deep carburized wear surfaces. Taper post-heat treat CNC machined to eliminate distortion Precisely machined to API standards. Long-life valve.

It has the size of API-3# thru API-9#
