

Features

- Flicker free
- High efficiency; high PF
- Ultra-quiet operation (<15dB)
- Current + CCT adjustable
- 5-year warranty (please refer to the warranty condition)

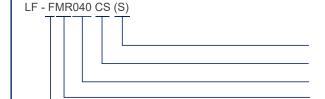

Applications

Indoor office lighting · decorative lighting · commercial lighting

Descriptions

LF-FMR040CS(S) is a 40W constant current LED driver. Its input voltage ranges from 220 to 240Vac and output current is adjustable from 200 to 350mA via DIP switch with every 50mA as a step. There is another DIP switch for adjusting CCT with 3 modes. It is suitable for Class I light fixtures, including tri-proof light, linear light, etc.

Product Model

- S: output current adjustable via DIP switch
- CS: current + CCT adjustable;
- 040: output power: 40W
- MR: indoor metal casing tri-proof light
- F: non-isolated design

Lifud Technology Co., Ltd.

■ Electrical Characteristics

Model		LF-FMR040CS (S)					
Output Voltage		45-130V		40-130V		40-115V	
	Output Current	Adjustable via DIP switch (optional)					
		200mA	250m.	A 3	300mA	350mA	
	Ripple Current (<100Hz)		$\pm 5\%$				
Output	Flicker Index	Complies with IEEE Std 1789-2015					
Сигриг	CIE SVM	≤0.4					
	IEC-Pst	≤1					
	Current Tolerance	±5%					
	Temperature Drift	±10%					
	Start-up Time	<0.5S	<0.5S				
	Input Voltage	220-240Vac					
	Input Voltage Range	198-264Vac					
	DC Input Voltage	180-264Vdc ^①					
	Input Frequency	0/50/60Hz					
	Input Current	0.3A max.					
Innut	PF	≥0.95					
Input	THD	≤15%					
	Efficiency	≥91%					
	Inrush Current	≤32A ^②					
	Loading Quantities	Model	B10	C10	B16	C16	
	of Circuit Breaker	Quantity (pcs)	13	21	21	35	
	Leakage Current	≤0.7mA					
Protection	Open Circuit	<200Vdc					
Characteristics	Short Circuit	Auto-recovery					
	Operating Temperature	-30°C - +60°C					
Environment	Operating Humidity	20-95%RH (no condensation)					
Descriptions	Storage Temperature/ Humidity	-30°C - +80°C (6 months in Class I environment); 10-95%RH (no condensation)					
	Atmospheric Pressure	86-106kPa

Test Equipment	AC power source: CHROMA6530, digital power meter: CHROMA66202, oscilloscope: Tektronix DPO3014, DC electronic load: M9712B, LED board, constant temperature and humidity chamber, lightning surge generator: Everfine EMS61000-5B, rapid group pulse generator: Everfine EMS61000-4A, spectroanalyzer: KH3935, hi-pot tester: EEC SE7440, flicker tester (flicker-free coefficient test): Everfine LFA-3000, etc.			
Test Remark	If there are no special remarks, the above parameters are tested at the ambient temperature of 25°C, humidity of 50%, maximum output power and input voltage of 230Vac/50Hz.			

■ Electrical Characteristics

- 1. It is recommended that user install the over voltage protection, under voltage protection and surge protection devices in the power supply circuits of light fixtures to ensure electricity safety.
- 2. The LED driver used in combination with the end device is one of the accessories of the whole light fixture, and the EMC of the whole light fixture is not only susceptible to the driver itself, but to the LED light fixture and the whole light fixture's wiring. Thus, the manufacturer of LED light fixture should re-confirm the EMC of the whole light fixture before the whole light fixture is finished.
- 3. The test conditions of the circuit breaker configuration quantity are the same as those of the
- 4. The PC cover, casing and end cap for assembling the LED driver in the light fixture must meet the fire rating of UL94-V0 or above.
- 5. It is well-advised that the withstanding voltage of LEDs and aluminum substrates >3kV.

Additional Remarks

- 6. It is recommended to install double-pole switch at AC input terminal. If user uses the single-pole switch, make sure to connect it to wire L (live wire), otherwise the afterglow of light fixture would be
- incurred after the AC is disconnected. 7. There exists stray capacitance between LED light fixture and aluminum substrate, and the light fixture will have transient slight brightness the moment the mains is connected and the aluminum substrate is connected to the earth (the whole light fixture connected to the earth). This is of no

abnormalities for a non-isolated LED driver. And if the above issue needs to be avoided, please

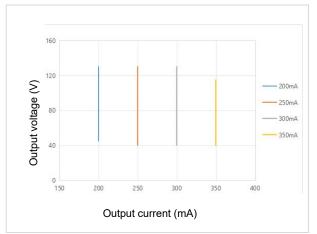

- replace the non-isolated with the isolated. 8. The light panel, fixed bracket and driver grounding should be secure.
- ① DC input is only for emergency with the maximum using time of 90 mins
- 2 @190uS

Note:

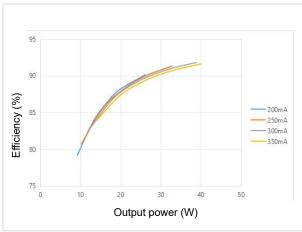

③ 5 years@Tc≤81°C

Carton Size	385*285*210mm (L*W*H)	
Quantity	15 pcs/layer; 5 layers/ctn; 75 pcs/ctn	
Weight	0.11 kg \pm 5% /pc; 8.69 kg \pm 5%/ctn	

■ Transportation and Storage

1. Transportation

- Suitable transportation means: vehicles, boats and aeroplanes.
- In transit, it is necessary to prepare awnings for rain or sun protection. Moreover, please keep civilized loading and unloading to prevent the vibration or impact of LED driver as much as possible.

2. Storage

The storage of LED driver shall conform to the standard of Class I environment. When using LED drivers which have been stored for more than 6 months, please re-test them firstly. Do not use them unless they are tested to be qualified.

Cautions

- Please use Lifud LED driver according to its parameters in the specification, otherwise the LED driver may malfunction.
- Using any incompatible light fixtures or those that have not been certified may cause fire, explosion or other risks.
- Man-made damage is beyond the scope of Lifud warranty service.

Remark: Lifud Tecnology Co., Ltd. reserves the right to interpret any contents of this specification.
