

Features

- Flicker free
- High efficiency; high PF
- Ultra-quiet operation
- Current + CCT adjustable
- IP20
- 5-year warranty (please refer to the warranty condition)

Applications

· Indoor office lighting · decorative lighting · commercial lighting

Descriptions

LF-FMR040CS(S1) is a 40W constant current LED driver. Its input voltage ranges from 220 to 240Vac and output current is adjustable from 150 to 300mA via DIP switch. There is another DIP switch for adjusting CCT with 3 modes. It is suitable for Class I light fixtures, including tri-proof light, linear light, etc.

Product Model

LF - F MR 040 CS(S1)

- CS: current + CCT adjustable; S1: distinction number
- 040: output power: 40W
- MR: indoor metal casing tri-proof light
- F: non-isolated design

■ **Electrical Characteristics**

Additional Remarks	<ol style="list-style-type: none"> 1. It is recommended that user install the over voltage protection, under voltage protection and surge protection devices in the power supply circuits of light fixtures to ensure electricity safety. 2. The LED driver used in combination with the end device is one of the accessories of the whole light fixture, and the EMC of the whole light fixture is not only susceptible to the driver itself, but to the LED light fixture and the whole light fixture's wiring. Thus, the manufacturer of LED light fixture should re-confirm the EMC of the whole light fixture before the whole light fixture is finished. 3. The test conditions of the circuit breaker configuration quantity are the same as those of the inrush current. 4. The PC cover, casing and end cap for assembling the LED driver in the light fixture must meet the fire rating of UL94-V0 or above. 5. It is well-advised that the withstanding voltage of LEDs and aluminum substrates >3kV. 6. It is recommended to install double-pole switch at AC input terminal. If user uses the single-pole switch, make sure to connect it to wire L (live wire), otherwise the afterglow of light fixture would be incurred after the AC is disconnected. 7. There exists stray capacitance between LED light fixture and aluminum substrate, and the light fixture will have transient slight brightness the moment the mains is connected and the aluminum substrate is connected to the earth (the whole light fixture connected to the earth). This is of no abnormalities for a non-isolated LED driver. And if the above issue needs to be avoided, please replace the non-isolated with the isolated. 8. The light panel, fixed bracket and driver grounding should be secure. <p>Note:</p> <ol style="list-style-type: none"> ① DC input is only for emergency with the maximum using time of 90 mins ② @190uS ③ 5 years@Tc≤81°C

■ Transportation and Storage

1. Transportation

- Suitable transportation means: vehicles, boats and aeroplanes.
- In transit, it is necessary to prepare awnings for rain or sun protection. Moreover, please keep civilized loading and unloading to prevent the vibration or impact of LED driver as much as possible.

2. Storage

- The storage of LED driver shall conform to the standard of Class I environment. When using LED drivers which have been stored for more than 6 months, please re-test them firstly. Do not use them unless they are tested to be qualified.

Cautions

- Please use Lifud LED driver according to its parameters in the specification, otherwise the LED driver may malfunction.
- Using any incompatible light fixtures or those that have not been certified may cause fire, explosion or other risks.
- Man-made damage is beyond the scope of Lifud warranty service.
