

- Flicker free
- High efficiency; high PF
- IP20
- Suitable for emergency lighting
- Suitable for Class I light fixtures
- 5-year warranty (please refer to the warranty condition)

Applications

Indoor office lighting · decorative lighting · commercial lighting

Descriptions

LF-FMR060YS is a 60W constant current LED driver. Its input voltage ranges from 220 to 240Vac and output current is adjustable from 200 to 350mA via DIP switch with every 50mA as a step. It is suitable for Class I light fixtures, including tri-proof light, linear light, etc.

Product Model

Lifud Technology Co., Ltd.

Electrical Characteristics

Model		LF-FMR060YS					
	Output Voltage	115-172V					
Output	Output Current	Adjustable via DIP switch					
		200mA	250m	A	300	mA	350mA
	Flicker Index	Complies with IEEE Std 1789-2015					
	CIE SVM	≤0.4					
	IEC-Pst	≤1					
	Current Tolerance	±7% ±5%					
	Temperature Drift	±10%					
	Start-up Time	<0.5S					
	Input Voltage	220-240Vac (voltage limit: 198-264Vac)					
	DC Input Voltage	180-264Vdc					
	Input Frequency	47Hz-63Hz					
	Input Current	0.4A max.					
	PF	≥0.9					
Input	THD	≤20%					
	Efficiency	≥89%	≥90% ≥91%		≥91%)	
	Inrush Current	≤35A&250uS					
	Loading Quantities of Circuit Breaker	Model	B10	C10	E	316	C16
		Quantity (pcs)	20	34	3	32	54
	Leakage Current	≤0.7mA					
Protections	Open Circuit	<250V					
	Short Circuit	Auto-recovery					
	Operating Temperature	-30°C - +50°C					
Environment Descriptions	Operating Humidity	10-95%RH (no condensation)					
	Storage Temperature/ Humidity	-30°C - +80°C (6 months in Class I environment); 10-95%RH (no condensation)					
	Atmospheric Pressure	86-106kPa

Testing Remark	If there are no special remarks, the above parameters are tested at the ambient temperature of 25°C, humidity of 50%, full load and input voltage of 230Vac/50Hz.
Additional Remarks	 It is recommended that user install the over voltage protection, under voltage protection and surge protection devices in the power supply circuits of light fixtures to ensure electricity safety. The LED driver used in combination with the end device is one of the accessories of the whole light fixture, and the EMC of the whole light fixture is not only susceptible to the driver itself, but to the LED light fixture and the whole light fixture's wiring. Thus, the manufacturer of LED light fixture should re-confirm the EMC of the whole light fixture before the whole light fixture is finished. The test conditions of the circuit breaker configuration quantity are the same as those of the inrush current. The PC cover, casing and end cap for assembling the LED driver in the light fixture must meet the fire rating of UL94-V0 or above. It is well-advised that the withstanding voltage of LEDs and aluminum substrates >3kV. It is recommended to install double-pole switch at AC input terminal. If user uses the single-pole switch, make sure to connect it to wire L (live wire), otherwise the afterglow of light fixture would be incurred after the AC is disconnected. There exists stray capacitance between LED light fixture and aluminum substrate, and the light fixture will have transient slight brightness the moment the mains is connected and the aluminum substrate is connected to the earth (the whole light fixture connected to the earth). This is of no abnormalities for a non-isolated LED driver. And if the above issue needs to be avoided, please replace the non-isolated with the isolated.

Packaging Specifications

Model	LF-FMR060YS		
Carton Size	385*285*210mm (L*W*H)		
Quantity 8 pcs/layer; 6 layers/ctn; 48 pcs/ctn			
Weight	0.122 kg/pc; 6.8 kg/ctn		

Transportation and Storage

1. Transportation

- Suitable transportation means: vehicles, boats and aeroplanes.
- In transit, it is necessary to prepare awnings for rain or sun protection. Moreover, please keep civilized loading and unloading to prevent the vibration or impact of LED driver as much as possible.

2. Storage

• The storage of LED driver shall conform to the standard of Class I environment. When using LED drivers which have been stored for more than 6 months, please re-test them firstly. Do not use them unless they are tested to be qualified.

Cautions

- Please use Lifud LED driver according to its parameters in the specification, otherwise the LED driver may malfunction.
- Using any incompatible light fixtures or those that have not been certified may cause fire, explosion or other risks.
- Man-made damage is beyond the scope of Lifud warranty service.
