

Product features:

1. This equipment is used for SMT production lines that are too long, and the middle needs to be convenient
2. Track telescopic, easy to operate
3. Ergonomic design makes the arm less fatigued
4. Using servo telescopic, the torque can be set in size to prevent injury
5. The folding CT time is short, which is convenient for personnel to pass
6. There is a one-touch lifting button at both ends, which is easy to operate

Technical Specifications

No	Item	Design Parameter
1	Power supply	110V/60Hz and 220V/50Hz
2	PCB transport height	Standard 910+/-20mm (other upon request)
3	Air supply	4-6bar
4	PCB thickness (mm)	0.4~5
5	PCB transport direction	Left to Right or Right to Left (optional)
6	Type of conveyor belt	<3mm flat belt
7	Cycle time	< 10 seconds
8	Mode of adjust width	Manually
9	Communication mode	Standard SMEMA interface

Name	Model	Dimension (mm)	PCB Suitable size (mm)
Telescopic conveyor	TC100-2S	L1300*W1074*H1450	L50*W50-L460*W460

(*Also customized for other special requirements)
