HEADLEADER®

4-Doors Frozen Locker

Headleader Frozen Locker provides temporary storage for groceries that requires to be kept under 0°C With air-cooling structure, the temperature would be more even and performance would be better without easy frosting. Patented electric lock can close the door automatically with cooperation with door closer. There will be light and audio notification to effectively avoid cold air leaking. RS-485 temperature controller realizes remote temperature management.

- Module design which is convenient for installation and maintenance
- Tidy cable arrangement
- Hardware of industrial standard with high stability and low faulty rate
- Conform to CE&UL standard
- Self-designed and patented control system components
- Remote control, surveillance and software upgrade available

Ambient conditions

Operating Range:

-15°F~32°F (- 2 5°C~0°C)

Noisy level: <50 dB

Voltage: AC110V/60HZ AC220V/50HZ

Power consumption

Working:600W Standby:2W

Configuration

Danfoss Commercia Refrigeration

System Refrigerant: R134A/R404A

EBM-PAPAST Motor Fan

RS-485 Temperature Controller for Rremote Temperature Management

Original Headleader Locker Control System

AC power check and UPS as Backup
